How to Update Windows QuickBooks Desktop:

Prior to installing QuickBooks Desktop on Windows, make sure your program has been updated:

- Open QuickBooks Desktop and select the Product Information window by pressing F2 or Ctrl + 1.
- Examine the release and version you are now utilizing.
- To find out if an upgrade is required, compare it with the most recent releases that are accessible.

To manually update Windows-based QuickBooks Desktop:

- To download the updates, select "Install Now" after choosing the "Update Available" option.
- Depending on the size of the download and your internet connection, wait for the installation to finish.
- To get the most recent updates, restart QuickBooks Desktop after installing it.

Does QuickBooks Update on Its Own?

QuickBooks Desktop does have automatic updating capabilities. You'll be notified via the status bar when there are updates available, and the updates will be downloaded and installed automatically.
